A suggestion

unwanted things in the water you drink

ALTERNATIVE

unwanted components in (or of?) your drinking water

Regards,

Martin

Subject: Agenda for Weekly Accord/SCoR data meeting 12/3/02

Hi everyone:

This note is to remind everyone of our weekly Accord/SCoR data meeting for tomorrow (**Tues 12/3**) at 4 - 5 pm. This is a conference call using the following toll free dial in number: **(877)287-0283, participants code 414095**. To prepare for the upcoming Accord/SCoR research session, we should discuss the following:

- Update on Accord biomarker data - we still need the updated/adjusted biomarker data for Accord

- SCoR biomarker data - we would like to know if there are any biomarker estimates we should be working with
- WSA reaction to the attached Marlboro communications draft - We would like WSA to review this draft for accuracy. A legal meeting is being set up for Monday, 12/9 to get approval on the draft for adult smoker research. I've included copy & graph for both the model & biomarker data sets. (For the biomarker draft, I've taken the compounds that are expected to be available for biomarkers from the model.).

Thanks & we'll talk to you tomorrow.
